Leading teams you develop with InterLAB

It is proven that under stress people “fall down” to certain personal communication patterns. Because of this automatism interferences can even creep into teams that usually work together with great performance and harmony. On InterLAB people are free to experiment: Here communication interferences do not cost money - they become part of the learning process.

InterLAB is a stress-simulator for executives

In lab conditions teams experience themselves in exceptional situations. They develop personal strategies to make themselves more resistant to stress related issues. Mission by mission the teams grow together. Intense experiences and successful optimizations become the basis for increased performance on the daily job.

InterLAB is independent of psychological models.

This opens the door to unlimited applications. You can combine InterLAB with any kind of content, personality profiles or methods.

Innovative trainers and human resource departments use InterLAB in the development of executives and in team building processes. With InterLAB you create a unique and highly efficient training experience as it is also used in astronaut and pilot training.

✓ Within minutes: Reveals typical behavioural patterns

✓ Within 1 hour: Trainees already have experiences of success

How does InterLAB work?

Competitive teams have to accomplish a space-mission in a captivating computer simulation. The members within a team work on two different stations. Only efficient communication leads to clarity and success.

Who benefits from InterLAB?

InterLAB is designed for executives and teams who are supposed to perform reliably even under extreme pressure of time and high responsibility. By playing a harmless simulation they experience how they can act more efficient in such situations.

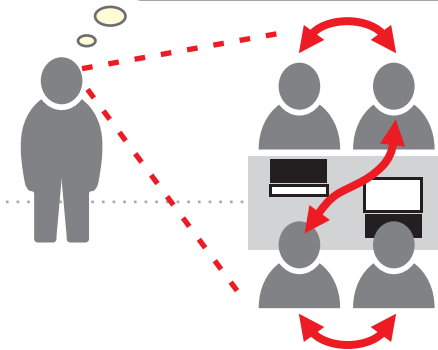

Additional information is used in decision-making processes.

The simulation immediately creates intense interaction - the focus is on communication in between the team members.

Behavior training for modern executives

InterLAB is "ready for take-off" for a wide range of objectives in training and assessment: Communication, team building, stress management, decision making, human error, personality profiles, virtual teams, ...

- information exchange
- task execution
- role allocation
- team & leadership
- agreements
- ...

InterLAB triggers intense interaction among each other. Interdependency of trainees lets them experience how to deal with trust.

Each of the two computers displays different information.

Already in just a few minutes: In this setting the trainees reveal individual and personal strategies and behavioural patterns within the team.

immediate feedback

Sustainable learning is based on immediate feedback. Here is the key to success: With InterLAB the trainees permanently receive a mix of quantitative and qualitative feedback from 3 sources:

Trainer:

professional attendance

Trainee:

self-assessment,
assessment of other

Computer:

neutral analysis

Trainees use the instant feedback to optimize their behaviour very effectively. Improvement takes place in short cycles accompanied with rapidly gained success. This way the trainees learn by getting insight and positive experience.

**InterLAB lets trainees immediately
perceive the sense and impact
of optimized behaviour.**

Increase efficiency of your behaviour trainings now!

Enthusiastic trainees, gripping trainings, high impact: Include InterLAB in your trainings and experience the competitive advantage!

your advantages at a glance

- ▶ high efficiency, immediate experiences of success
- ▶ highly motivated trainees because of competitive scenario
- ▶ team sizes between 2 and 4

- ▶ up to 4 teams (max. 16 trainees)
- ▶ running time of one session e.g. 10, 20 or 30min.
- ▶ independent of job profile, no specific knowledge required
- ▶ flexible integration in your training
- ▶ high immersion into training matter
- ▶ sessions follow a standardized sequence
- ▶ easy-to-use and secure system, no maintenance, independent of internet
- ▶ (dis-)assembly of computers/laptops within 10min.
